

SANTERRA **GREEN** 

SANTERRA GREEN™ COMPOSTING TOILETS

SANTERRA GREEN™ COMPOSTING TOILETS

Santerra Green™ is a line of composting toilet systems from Sancor, the leaders in the composting toilet industry.

Environment-Friendly Sanitation

Composting is simply nature's method of renewing and preserving itself. In nature, decayed organic material, whether plant or animal, gradually decomposes and becomes either water or enriched soil, very much like your garden compost. Santerra Green™ Composting Toilet Systems help nature's proven method by reducing and recycling waste into natural compost, while using little or no water in the process.

Choice of Waterless or Low Water Models

Santerra Green™ gives you the choice of a completely waterless system or a low water system that uses as little as one pint of water per flush. What you choose will depend on your application and your personal preference. Be sure to speak to an authorized dealer if you have any questions.

Choice of Power

Each type of system is available in choice of power. Choose a Non-Electric, 12VDC Battery or AC Electric model. AC Electric models are recommended if possible.

Choice of Color

Santerra Green™ comes in more than blue! Santerra Green™ is available in a choice of colors to compliment your bathroom. Ask dealer for color options.

Nice to the earth

SANTERRA**GREEN** 

PATENTED AUTOMATIC SIX-WAY AERATION™

Advanced design speeds up the composting process

Santerra Green™ Composting Toilet Systems are designed and engineered around Sancer patented Automatic Six-Way Aeration™ and evaporation process for faster composting.

What it Does

Santerra Green™ converts waste into compost with patented Automatic Six-Way Aeration™ and natural microbe-action. Liquid is evaporated and/or drained (depending on model).

The Science Behind Santerra Green™

Dual fans, operating in conjunction with natural microbe-action, continuously circulate a large volume of air at a high flow rate around a specially shaped Aeration Basket. The Aeration Basket lines the inside of the system and maximizes waste surface area for better efficiency.

Breakthrough Technology

Santerra Green™ has two Fans where some others have only one. Santerra Green™ technology dramatically improves both waste reduction and recycling by increasing aeration, evaporation and microbe activity. Non-electric models use a wind turbine ventilator, also not found with others.

Small So It Fits!

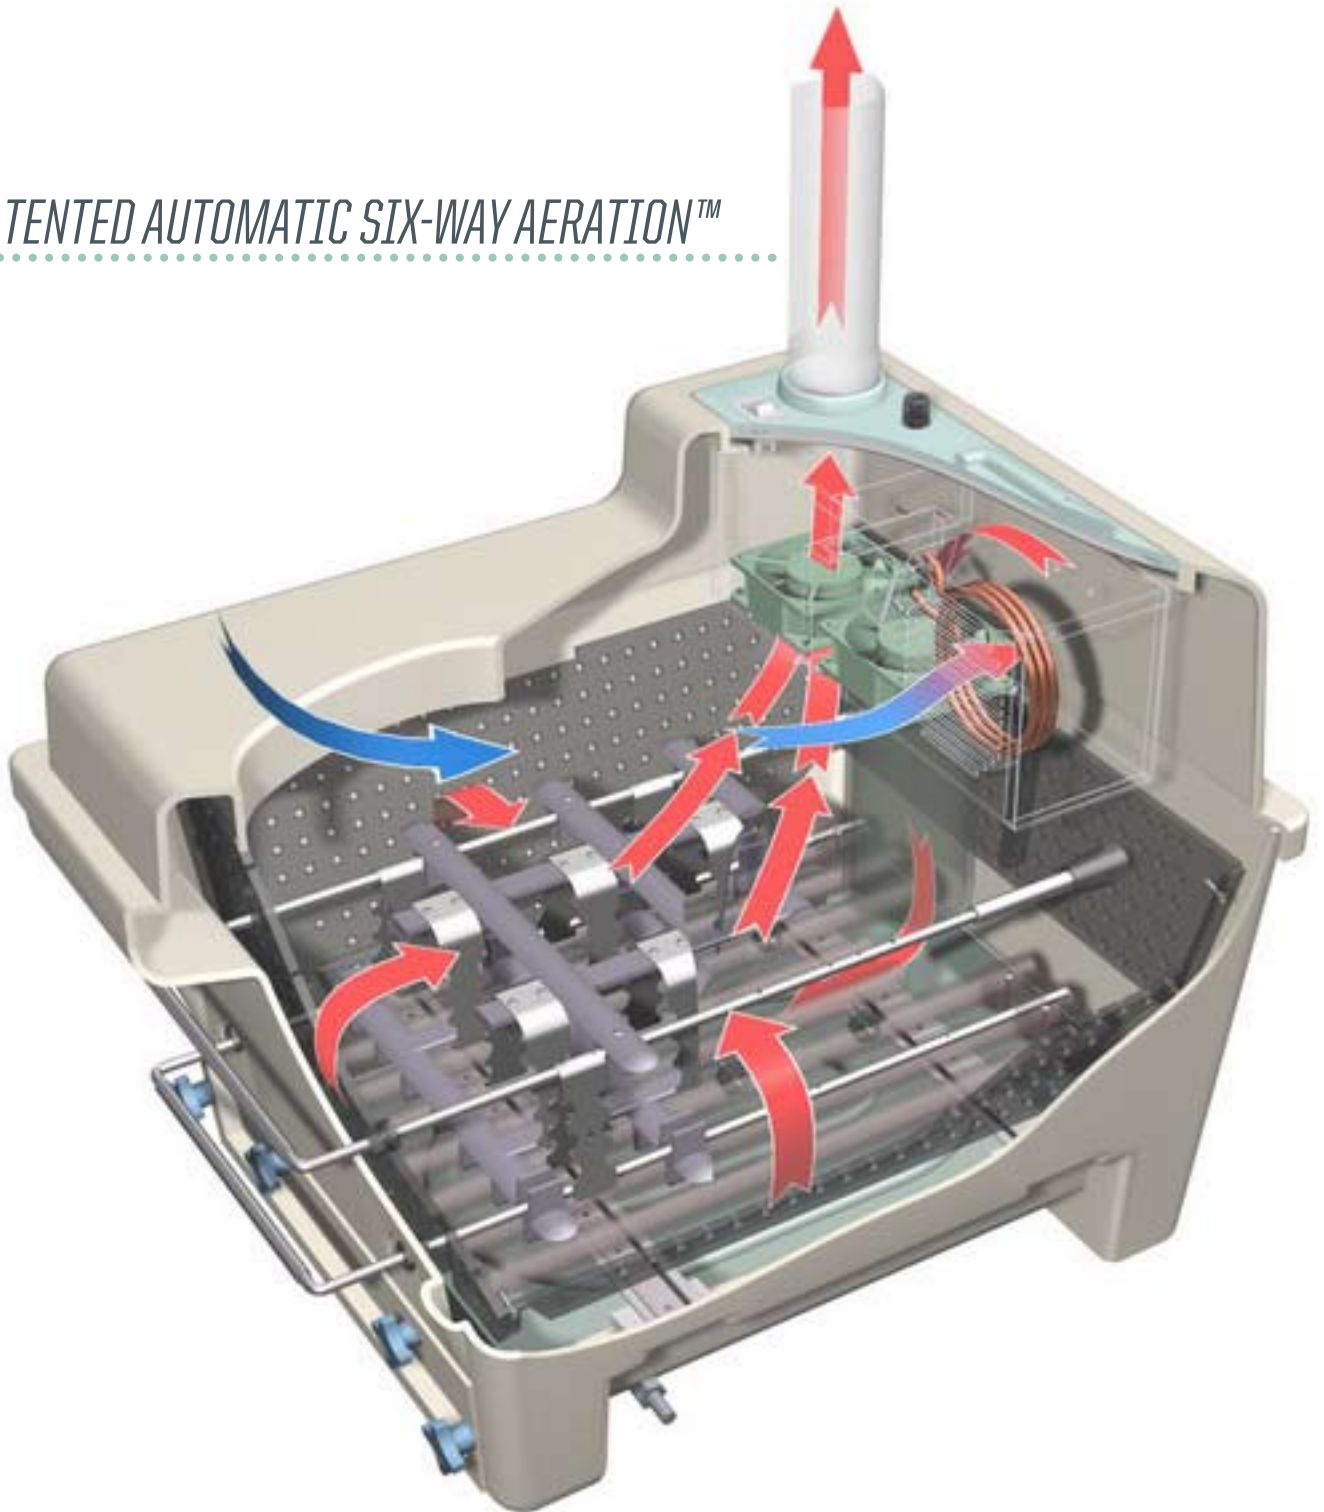

In addition, the patented design allows for significant reduction of the System size, while still maximizing System performance. This also means that Santerra Green™ does not have a step-up like some others.

No Drum Turning

This superior aeration system makes Santerra Green™ operation both convenient and simple, and eliminates the tiresome turning of waste required by some “manual drum” toilets.

SANTERRAGREEN 

PATENTED AUTOMATIC SIX-WAY AERATION™

SYSTEMS

There are three types of Santerra Green™ Composting Toilet Systems to choose from.

The Santerra Green™ **X, Y** and **Z Series**.

Each Santerra Green™ Series is available in choice of non-electric, 12v battery or 120v electric and has its own advantages, depending on the application.

Popular Applications

Cottages & Cabins
Homes
Pool Cabanas
Barns & Farms
Construction Sites
Golf Courses
Guard Towers
Yurts
RV's & Trailers
Workshops
Basements & Garages
Warehouses

Santerra Green™ Features

Santerra Green™ X Series

Waterless
All-in-One
Install anywhere

X

Y

Santerra Green™ Y Series

Waterless
High-Capacity
Small bathroom toilet

Santerra Green™ Z Series

Low Water
Install Multiple Toilets
Ceramic Bowl

Z

SANTERRA GREEN™ X SERIES

Santerra Green™ X Series **waterless toilets** are “all-in-one” systems that can go almost anywhere. Ideal for bathrooms that have little or no space below for remote compost unit such as a basement. No step-up! Less than 20” in height to seat, lower than most others.

X MARKS THE SPOT

- Completely waterless
- Installs almost anywhere
- Many color options
- Ideal for winter use
- Drain not required on all models

X30 ELIMINATES NEED TO DRAIN

The Santerra Green™ X30 does not require a drain. It is able to handle all of the liquid because of its dual fans and thermostatically controlled heater.

X SERIES QUICK FACTS

- The bowl is removable for easy cleaning
- X10 and X20 models use a unique wind turbine ventilator

• Santerra Green™ X10

- Non-Electric
- 4 people/day vacation use
- 2 people/day full-time use

• Santerra Green™ X20

- 12v Battery
- 6 people/day vacation use
- 4 people/day full-time use

• Santerra Green™ X30

- AC Electric
- 8 people/day vacation use
- 6 people/day full-time use

GOES ANYWHERE

WIND TURBINE

SANTERRA GREEN™ Y SERIES

Highest capacity Santerra Green™ system that features a unique **waterless toilet** with a removable bowl that is located in the bathroom with the remote composting unit located directly below.

WHY GO WITH Y?

- Completely waterless
- High-capacity
- Elegant toilet in many color options
- Easy-to-clean removable bowl
- Ideal for winter use
- Drain not required on all models

Y60 ELIMINATES NEED TO DRAIN

The Santerra Green™ Y60 does not require a drain. It is able to handle all of the liquid because of its dual fans and thermostatically controlled heater.

QUICK WATER SAVINGS FACT

Did you know that a family of four will flush more than 30,000 liters of water every year with a “normal” flush toilet. With a Santerra Green™ Y Series System, you will flush **0 liters**.

INSIDE BATHROOM

BELOW BATHROOM

Santerra Green™ Y40

- Non-Electric
- 6 people/day vacation use
- 4 people/day full-time use

Santerra Green™ Y50

- 12v Battery
- 8 people/day vacation use
- 6 people/day full-time use

Santerra Green™ Y60

- AC Electric
- 10 people/day vacation use
- 8 people/day full-time use

SANTERRA GREEN™ Z SERIES

Ceramic **low flush toilet** that uses about a pint per flush in bathroom with remote composting unit below or to side as long as gravity drop is maintained. You can install up to three low flush toilets per Z Series System.

SHOULD I STAY OR SHOULD I Z?

- Uses only about 1 pint per flush
- High-capacity
- Ceramic toilet in bathroom
- Can install multiple toilets per system

FLUSH IT AWAY GREEN TECHNOLOGY

The Santerra Green™ Z Series delivers just that. A toilet that is ceramic and uses water (a small amount, mind you) to flush to a compost system.

HOW MANY TOILETS?

You can have up to three toilets per system with the Z Series as long as you can maintain a gravity drop from toilet to compost unit.

INSIDE BATHROOM

BELOW BATHROOM

Santerra Green™ Z70

- Non-Electric
- 6 people/day vacation use
- 4 people/day full-time use

Santerra Green™ Z80

- 12v Battery
- 8 people/day vacation use
- 6 people/day full-time use

Santerra Green™ Z90

- AC Electric
- 10 people/day vacation use
- 8 people/day full-time use

30+ YEARS EXPERIENCE

The name Santerra Green™ may be new but technology is not.

Santerra Green™ is manufactured in North America by Sancor Industries Ltd, the Green Factory. Sancor has over 30 years experience in the composting toilet industry.

Experience and history are important when choosing a composting toilet system to go with and shows in the after-sales service & support and warranty protection that you get with Santerra Green™.

SANTERRA**GREEN** 

WARRANTY

Santerra Green™ Composting Toilet Systems come with impressive warranty protection.

All Santerra Green™ Systems include:

- **5-Year Warranty** on all internal components
- **Lifetime Warranty** on system body

5
+ LIFETIME

CERTIFIED FOR USE

Santerra Green™ Composting Toilet Systems are certified for performance and safety by CSA (Canadian Standards Association).

- **All models** are CSA ANSI/NSF STANDARD-41 certified.
- **All AC electric** models are CSA certified to UL499 (USA) or C22.2 No. 64-M91 (Canada) for electrical safety.
